

OAM-S-Mount

Sectional Door Mounting Bracket for the OAM-EXPLORER Combination Sensor

The OAM-S-Mount is specifically designed for sectional doors, vertical lift doors, or any doors where you can't install the motion sensor above the opening. The OAM-S-Mount is attached across the inside of the opening (cross member supplied by others) and puts the OAM-Explorer in the correct position. The OAM-S-Mount is clean, quick and easy to install. The OAM-S-Mount is constructed of clear anodized aluminum tubing that can be cut to fit if needed.
